

# AN INDEX OF EMERGENCY PARACHUTE JUMPS IN CANADA AND NEWFOUNDLAND 1927-1945

This is an attempt to index emergency parachute jumps made in Canada and Newfoundland between 1927 and 1945 and comprises a chronological table of jumps followed by an alphabetical list of the jumpers. More than 440 jumps are listed of which it has been possible to identify 420 personnel with at least a partial name. One woman appears on the list. Two of the jumpers made a second jump and an unknown number would have made second jumps overseas.

Civilian jumpers were identified from newspaper reports and published aviation histories. Information on air force jumps was extracted from unit diaries and accident investigation files held on microfilm by Library and Archives Canada. USAAF and USN jumpers were identified from US accident reports available at *accident-report.com* and Mireles' *Fatal Army Air Forces Aviation Accidents in the United States, 1941-1945* for flights originating in the USA.

In the table, following the date and name is the affiliation of the parachutist and then civil owner or military unit operating the aircraft followed by the aircraft type and registration or serial number.

The Canadian province (plus NL for Newfoundland) or US state where a jumper landed is listed using the current two-letter Canadian and US postal abbreviations.

Forty-one of the jumpers were killed, bailing out too low and landing in water being frequent causes of death. The unlucky 41 are identified by 'X' in the penultimate column of the table. A check mark (✓) indicates a life saving landing although many were not without injuries, sometimes serious.

The final column in the table describes the circumstances of the jump, which may not necessarily have been the primary cause. The mark >> following an entry indicates that a note about the incident follows the chronology table.

Why are locations of jumps not listed? Early in the compilation it became clear that the majority of reports and accounts of the jumps gave only vague, ambiguous or contradictory locations. Many jumps were made over unorganized or un-named wild areas and even in farmed areas a parachutist could trudge, often limp, several miles to find a farm or named settlement. A night jump made identification of landing spots even more unlikely. Accident investigation reports tend to offer better detail regarding the place of the incident but not all these have survived.

Additions to the list will be warmly received. Comments and questions are also welcome. [ian27mac@bell.net](mailto:ian27mac@bell.net)

**Ian Macdonald, Ottawa**

Thanks to John Henderson, Terry Judge and Tony Broadhurst for filling in some of the blanks

### **Bail out or bale out?**

"In Canadian and American English, to *bail out* is to dip water out of a boat, to make an emergency exit from an aircraft, to assist someone in an emergency, or to guarantee security for the release of a person held in custody. To *bale* is to bundle and bind hay, cloth, etc.

In British English, *bale* means bundle and bind, but is also the preferred spelling for all the 'bail' meanings above except the last, to guarantee security for a person in custody."

(*Oxford Guide To Canadian English Usage*, Fee & McAlpine, 1997)

## Notes

### **17NOV40 Digby 749**

Fuel critical at night in bad weather, Richardson and Clay apparently made a successful jump using the same parachute but broke through thin ice on lake and drowned. Howard's remains were found in June 1944

### **29MAY41 Harvard 2714**

Needs verification, incident not mentioned in ORB, press report transcribed in *PRAIRIE WINGS* (Carter)

### **20DEC41 Tiger Moth 4052**

Landed in Fraser River, not picked up, remains recovered June 1942

### **01MAY42 Battle 2039**

At conclusion of exercise pilot asked students to 'look out', they misinterpreted his instruction and bailed out

### **28JUL42 Finch 1027**

Sergeant Doubassof's service number is also quoted as R125474

### **02OCT42 Crane 8074**

LAC Smith's service number is also quoted as R120583

### **28OCT42 Stearman FJ907**

Involuntarily left aircraft while demonstrating a slow roll to CFS Visiting Flight examiner, flying suit fastener had fouled harness pin and pulled it out

### **05JAN43 Anson AX426**

Civilians watched parts detach and a man bail out before the Anson crashed through sea ice during a storm near North Cape

### **26FEB43 Hudson BW653**

Crew rescued from sea ice in Northumberland Strait five days later. Pilot Officer Barette lost both feet to frostbite

### **26APR43 Mosquito**

The Mosquito was probably KB301

### **28APR43 Ventura AJ164**

Smoke from defective heater filled cabin causing panic, Corporal Butt and Newfoundland Ranger John Hogan survived in the bush until found 25<sup>th</sup> June, a book, *Jump Ranger Jump*, describes their ordeal. There was only one parachute for Moore and Maley, it is possible they attempted to use the same parachute, there was evidence that one was dismembered by the tailplane. They remain missing, oddly, the CWGC commemorates Moore on the Runnymede Memorial and Maley on the Ottawa Memorial.

### **14MAY43 Anson 7064**

Student navigator R179314 LAC K.G. Spooner took the controls and ordered the other occupants to jump when the pilot lost consciousness, he was killed when the Anson crashed into Lake Erie, for his actions LAC Spooner was awarded the George Cross

### **12DEC43 Harvard FE757**

The Court of Enquiry referred to Pilot Officer King as Lieutenant, Canadian Active Army, attached to RCAF

### **20MAR44 Hurricane BW883**

Sergeant Streete's name is spelled 'Street' in a later report

### **18AUG44 Kittyhawk 863**

Pilot Officer Wilkie lost a leg exiting the aircraft and made a tourniquet from his shirtsleeve as he descended, picked up from sea 20 minutes later and transferred to a 3 OTU Canso. Mentioned in Despatches
